						O x3 (M8*40/M8/M8*22*2) 
						P Hex key x1 

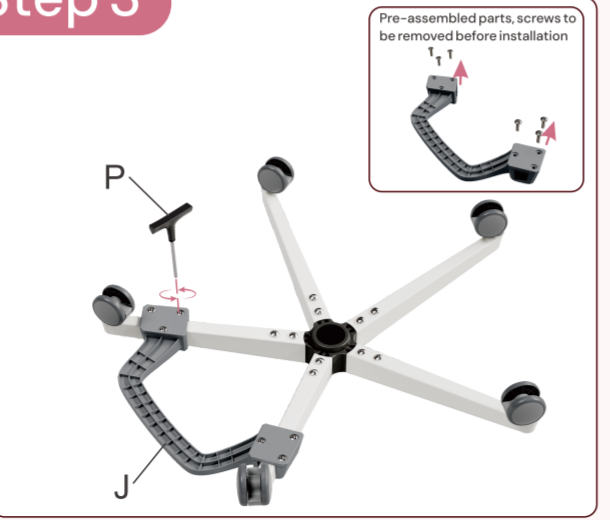

Assembly Guide

Step 1

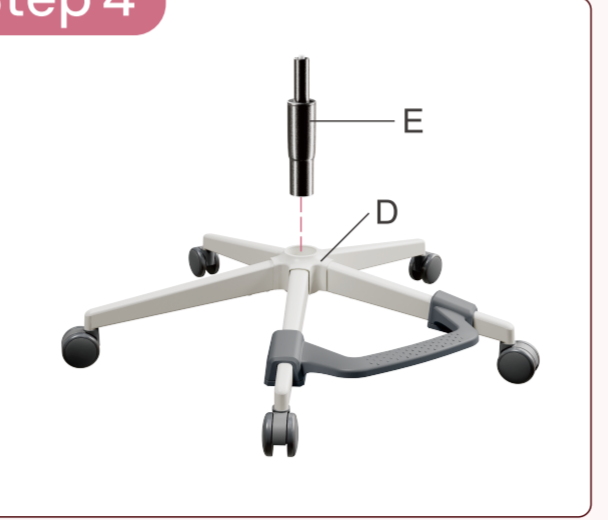

Insert all five base legs (B) into the wheelbase core (C). Secure them with the M6*20 screws (M) and tighten firmly using the hex key (P).

Step 2

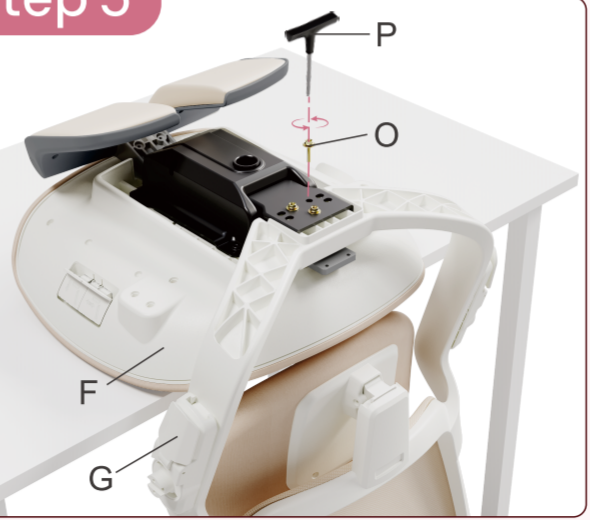

Insert each caster (A) into the end of each leg until it clicks into place and feels secure.

Step 3

Remove the pre-installed screws from the foot pedal (J). Align the pedal with the slots on the base leg and reattach the screws using the hex key (P), making sure it's firmly fixed.

Step 4

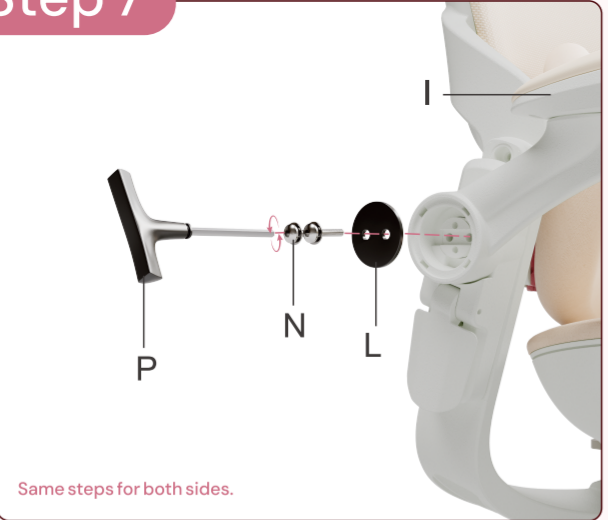

Place the center cover (D) into the middle of the wheelbase. Then insert the gas lift (E) into the cover, pressing it down firmly.

Step 5

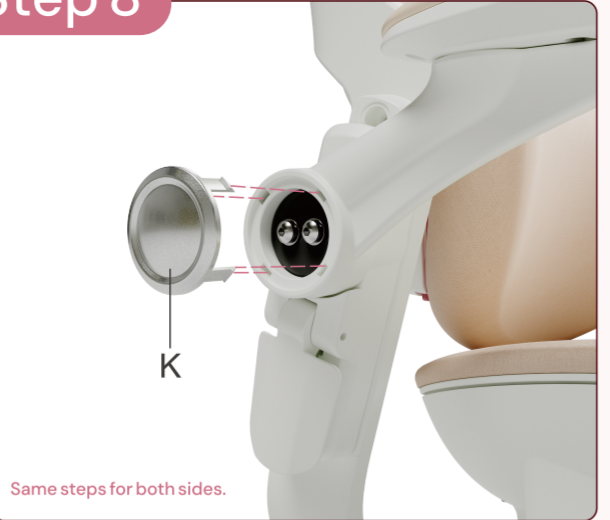

Place the seat base (F) on a table or box. Align the backrest (G), insert the M8 screws (O), and tighten with the hex key (P).

Step 6

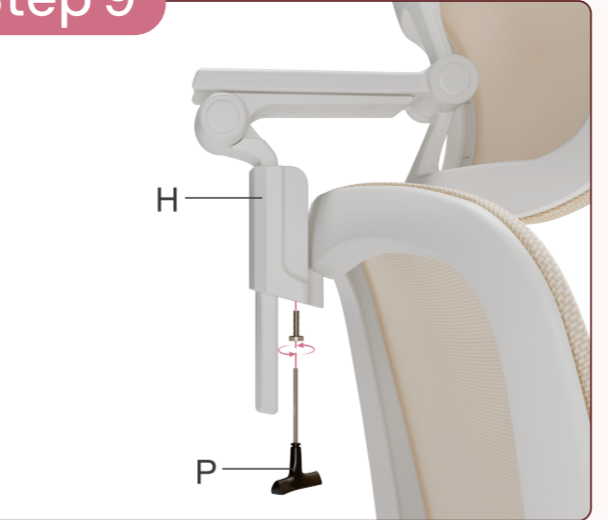

Carefully place the seat base (F) onto the gas lift (E) installed in the wheelbase. Make sure the connection is firm and the seat is properly fitted.

Step 7

Align the armrests (I) with the sides of the seat. Secure each one with the M6*35 screws (N) and gasket (L), tightening them with the hex key (P).

Step 8

Place the armrest covers (K) over the screw areas and press until they click into place.

Step 9

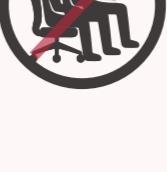

Remove the screws from the headrest (H), align it with the holes on the backrest, then reattach the screws and tighten them with the hex key (P).

Step 10

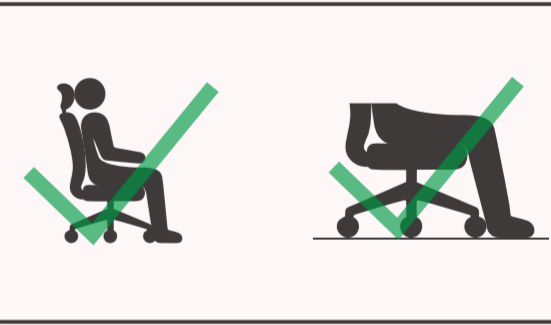

Congratulations! Your chair is now fully assembled. Please check all parts to ensure they're secure—and enjoy your new chair!

Safety Information

Prohibited Actions

-  Do not push or drag the chair while someone is sitting in it.
-  Do not press down on the backrest when someone is reclining.
-  Do not place your full body weight on the backrest alone.
-  Do not stand or step on the chair.
-  Do not sit only on the front edge of the seat.
-  Do not use the chair with more than one person.
-  Avoid Heat and Humidity.

Recommended Use

-  Sit fully in the center of the seat with your back against the backrest.
Keep both feet flat on the floor for balance.
-  Use the chair only for sitting and reclining, not as a ladder or support.
-  Adjust all functions gently using the designed levers.

 **330 LBS**
Recommended load ≤ 150KG (330 lbs)

6 Key Functions to Customize Your Comfort

**1. Headrest Adjustment**

Move up/down to fit neck height. Tilt for optimal cervical support.

**2. Lumbar Support Adjustment**

Slide or rotate knob to fit lower back curve.

**3. Backrest Recline Adjustment**

Multi-position tilt lock (90°-125°).

**4. Armrest Adjustment**

Raise/lower, flip up, and shift forward/backward.

**5. Seat Height & Depth**

Use lift lever to adjust height. Slide seat forward/backward (if applicable).

**6. Footrest Adjustment (if applicable)**

Pull out to relax; push in to store.
